

Gravity-Fed Water Filter Dispenser

This gravity-fed water filter dispenser is designed for purifying drinking water in homes or offices. It uses a multi-stage filtration process, including ceramic, carbon, and mineral filters, and requires no electrical connection.

Product Overview

Gravity-Fed Water Filtration System

This countertop water filter dispenser provides a reliable, electricity-free solution for clean drinking water in homes or offices. Utilizing a multi-stage filtration process, it effectively removes impurities while enhancing taste through a combination of ceramic, activated carbon, and mineral media. The gravity-fed design ensures easy operation with a clear visual separation between unfiltered and purified reservoirs.

Technical Specifications

Filtration Stages

- Ceramic filter
- Activated carbon filter
- Mineral stones

Electrical Requirement

None (Gravity-fed)

Design & Utility

Key Features

Multi-stage filtration • Transparent reservoirs • No electricity needed • Mineral enrichment

Installation Type

Countertop

Dispensing Mechanism

Manual tap
