Product Overview

Industrial-Grade Push Button Switch

This robust green push button switch is engineered for reliable control and signaling in industrial power transmission and distribution systems. Designed with ergonomic operation in mind, it provides clear visual status and consistent performance in demanding environments. The unit features a standard normally open (NO) contact configuration, ensuring seamless integration into existing control architectures.

Technical Specifications

Electrical Performance

500 V

Rated Insulation Voltage (Ui)

10 A

Rated Thermal Current (Ith)

400 V

Operating Voltage

Contact Type

Normally Open (NO)

IP Protection

IP40

Compliance and Standards

Standards Compliance

- IEC60947-5-1
- EN60947-1

Certifications
