

Grid-Tie Solar Inverter 1.8-2.3kW

This photovoltaic inverter is designed for home rooftop photovoltaic systems under a modern industrial concept. It uses state-of-the-art control technology, providing powerful input voltage and input current capability.

Product Overview

High-Efficiency Grid-Tie Solar Inverter

This 1.8-2.3kW grid-tie solar inverter is engineered for reliable renewable energy conversion. It efficiently transforms DC power from solar arrays into grid-compatible AC electricity for residential and commercial applications. The unit features robust construction and advanced monitoring capabilities to ensure consistent performance and energy management.

Technical Specifications

Max DC Work Current	1.8 A
---------------------	-------

Compliance and Standards

Industry Certifications	VDE 0126-1-1/AI, AS4777.1/2/3, RD1663, ENEL, G83, G59-2
-------------------------	---
