

Grinding and Abrasive Wheel Set

This set includes flat abrasive discs, segmented grinding wheels, and ring-shaped abrasive wheels. They are designed for material removal and surface finishing on metal, wood, and construction materials.

Product Overview

Professional Abrasive and Grinding Set

This comprehensive set of abrasive and grinding wheels is engineered for high-performance material removal and precise surface finishing. Designed for versatility, the kit includes specialized discs for dust extraction, aggressive grinding, and specific surface tasks. These tools are compatible with standard grinding machines, making them an essential addition for professional metalworking, woodworking, and construction workflows.

Technical Specifications

Included Components

- Flat abrasive disc with dust extraction perforations
- Segmented grinding wheel for aggressive material removal
- Ring-shaped abrasive wheel with perforations

Suitable Applications

Metalworking, Woodworking, Construction

Equipment Compatibility

Standard grinding machines
