

Grinding Brick for Material Removal

This grinding brick is designed for efficient material removal and surface preparation. It is constructed from durable abrasive materials, making it suitable for use on a variety of materials including steel, aluminum, and stone.

Product Overview

Professional Material Removal

This high-quality grinding brick is engineered for efficient material removal and precise surface preparation. It is an essential tool for sharpening, deburring metal components, and smoothing rough edges. Built from durable abrasive materials, it ensures long-lasting performance and consistent, uniform grinding action.

Technical Specifications

Primary Applications

- Sharpening tools
- Deburring metal
- Smoothing rough edges
- Surface preparation

Performance Features

Durable Construction • Uniform Grinding Action • Professional Grade

Compatible Materials

Steel, Aluminum, Stone
