

Grinding Gauge Sharpening Wheel

Precision grinding wheels are designed for use with grinding gauges. The durable construction ensures long-lasting performance and consistent results for sharpening tools and precision instruments.

Product Overview

Precision Grinding Solution

This grinding wheel is specifically engineered for use with grinding gauges, ensuring optimal performance and accuracy in precision grinding operations. Manufactured to exacting standards, it provides consistent results for sharpening and shaping tools, gauges, and other precision instruments. The durable construction supports both wet and dry grinding applications to suit diverse workshop requirements.

Technical Specifications

Grinding Method

Wet Grinding • Dry Grinding

Application Compatibility

Grinding Gauges, Tool Sharpening, Precision Instruments

Safety and Compliance

Safety Requirements

Safety glasses must be worn during operation.
