

Groove Cutting Power Tool

This groove cutting machine is designed for precise and efficient cutting of grooves. It features a powerful motor, adjustable cutting depth, and robust construction.

Product Overview

Professional Groove Cutting Performance

This professional-grade groove cutting tool is engineered for precision and efficiency in demanding construction and renovation environments. Powered by a robust 1500W motor, it delivers consistent performance at 6000 RPM, making it suitable for cutting grooves in various materials. Designed with user safety and ergonomics in mind, it features a durable construction and a protective safety guard for reliable operation on the job site.

Technical Specifications

Performance Metrics

1500 W

Power Output

6000 RPM

No-load Speed

Model Number	JCK003
Blade Diameter	125 mm
Spindle Size	M14

Features

Key Features

- Powerful 1500W motor
- Ergonomic handle design
- Integrated safety guard
- Robust construction for durability
