

Grooved Abrasive Grinding Wheel

This abrasive grinding wheel is precision-engineered with multiple circumferential grooves for enhanced cooling and debris removal. Constructed from high-quality abrasive materials, this wheel offers exceptional durability and consistent performance.

Product Overview

Precision-Engineered Grinding Solution

This grooved abrasive grinding wheel is designed for high-performance grinding, shaping, and finishing tasks. Its specialized circumferential grooves significantly enhance cooling efficiency and facilitate debris removal during operation. Engineered for durability, this wheel helps prevent workpiece damage caused by heat buildup, ensuring consistent results in demanding industrial environments.

Technical Specifications

Industrial Applications

- Tool and die making
- Metalworking
- Automotive manufacturing

Key Benefits

Extended Wheel Life • Prevents Workpiece Damage • Consistent Performance

Design Features

Circumferential Grooves, Heat Dissipation, Debris Removal, Precision Engineered
