

# Ground Marking Stake Flag

Durable stake flags are designed for marking boundaries, underground utilities, or survey points. These flags feature a robust wire stake for easy ground penetration and a brightly colored flag for clear identification.

## Product Overview

### Professional Marking Solution

These stake flags are engineered for high visibility in demanding environments such as construction sites, landscaping projects, and utility surveys. Featuring a robust construction with a wire stake for reliable ground penetration, they ensure clear and persistent identification of marked areas. The flags are available in eight distinct colors, allowing for efficient color-coded site management.
