

# Grounding Earth Clamp

Grounding earth clamps provide a secure electrical connection to earth for safety and equipment protection. They are constructed from durable materials, ensuring long-lasting performance and reliability in diverse conditions.

## Product Overview

### Reliable Grounding Solutions

The EC15/16 series earth clamps are engineered for dependable grounding performance across diverse environmental conditions. These units ensure a secure electrical connection to earth, prioritizing both safety and the protection of connected equipment. Built with durable, corrosion-resistant materials, they offer long-lasting reliability and straightforward installation for various industrial applications.

## Technical Specifications

### Application Suitability

Electrical Grounding • Equipment Protection • Safety Systems
