Product Overview

Professional Grout Cleaning Sponge

This high-density PU material sponge is engineered for professional tiling projects, offering superior water holding capacity for efficient grout removal. Designed with fully rounded corners to prevent splashes and ensure smooth tile finishes, it is an essential tool for both residential and commercial applications. The durable construction allows for effective cleaning of grout lines and residue without scratching surfaces.

Technical Specifications

Design Features

- Fully rounded corners
- High-density porous structure
- Ergonomic rectangular shape

Key Performance Metrics

100 %
Water Absorption

Material

PU (Polyurethane) Foam

Usage & Applications

Operational Benefits

Prevents Splashing • Scratch Resistant • High Durability • Easy Maneuvering

Primary Applications

Grout Smoothing, Residue Removal, Tile Cleaning, Residential Tiling, Commercial Tiling
