

GRT128 Truck Tire

The GRT128 truck tire is engineered for durability and optimal performance in demanding commercial applications. Its robust construction and advanced tread design provide superior traction, stability, and long-lasting wear.

Product Overview

Built for Commercial Durability

The GRT128 is a heavy-duty truck tire engineered to deliver optimal performance and reliability in demanding commercial environments. Featuring a reinforced casing, this tire is specifically designed to withstand significant load capacities while providing superior stability and safety. Its specialized rubber compound and deep tread pattern ensure extended longevity and excellent traction across diverse road conditions.

Key Features

Traction Capabilities

- Excellent grip in wet conditions
- Superior traction in dry conditions
- Stable handling under heavy loads

Core Performance Attributes

Reinforced Casing, Deep Tread Design, Reduced Rolling Resistance, Heavy Load Capacity
