

GSM 15dBi Die-Cast Grid Antenna

This GSM die-cast grid antenna operates within a frequency range of 870-960MHz. It offers a 15dBi gain and measures 600*900mm.

Product Overview

High-Performance GSM Grid Antenna

This die-cast grid antenna is engineered for reliable wireless communication, offering a high gain of 15dBi to significantly extend network coverage. Designed for durability in challenging outdoor environments, it features a robust construction capable of withstanding harsh weather conditions. It is an ideal solution for improving signal quality and connectivity in diverse professional applications.
