

GSM Feature Phone with Music Playback

This feature phone is designed for entertainment and communication. It offers a vibrant display for multimedia, dedicated music controls, and a keypad for easy texting and dialing.

Overview

Designed for Entertainment and Communication

This feature phone combines reliable GSM connectivity with a specialized focus on high-quality audio playback. Equipped with dual music chips, including WOLFSON and YAMAHA components, it delivers an enhanced listening experience for MP3 and MP4 media. The device features a compact, sleek design with a 2.4-inch display, making it a practical and portable solution for users who prioritize music and essential mobile functionality.
