

GSM/CDMA Communication AP Antenna

This AP antenna is designed for GSM/CDMA spread spectrum communication systems. Its small dimension and light structure make it easy to install.

Overview

High-Performance Communication Antenna

This GSM/CDMA Communication AP Antenna is engineered for reliable wireless signal transmission in demanding environments. With a robust design and optimized gain, it ensures stable connectivity for extended range applications. The unit is built to withstand extreme temperature variations, making it a versatile solution for professional communication infrastructure.

Electrical Specifications

Gain

5 dBi

Gain

Frequency Range	824~896 / 1850-1990 MHz
VSWR	2 d
Polarization	Vertical
Impedance	50 ©
Maximum Input Power	50 W

Mechanical Specifications

Connector Type

N Male

Dimensions	120 × 178mm
Weight	30 g
Operating Temperature	-40°C to +80°C
