

GT42 Automotive Turbocharger

The GT42 turbocharger increases engine power and efficiency. It features a durable compressor and turbine wheel design for enhanced airflow and boost pressure.

Product Overview

High-Performance Turbocharger

The GT42 Automotive Turbocharger is engineered to deliver increased horsepower and torque, significantly enhancing overall engine performance. It features a robust construction with precision-balanced rotating assembly and advanced aerodynamics to optimize airflow and boost pressure. Designed for reliability under demanding conditions, this unit is an ideal upgrade for professional applications requiring improved throttle response and power output.

Technical Details

Part Numbers

Type	Part Number
Internal Reference	G4220004X
Original Equipment (OE)	714788-5

Application Compatibility	Detroit Diesel Series 60
----------------------------------	--------------------------

Model Identification	GT4294
-----------------------------	--------

Key Features

Design Highlights

- Precision-balanced rotating assembly
- Advanced aerodynamic design
- Durable turbine and compressor wheels
- Integrated wastegate actuator for boost control
- Optimized turbine housing for exhaust flow
