Product Overview

High-Performance Shank Adapter

This shank adapter is engineered for demanding rock drilling and piling operations, serving as a critical component for transmitting power between the drill machine and drill stems. Designed for durability and precision, it ensures stable energy transfer, which enhances overall drilling performance and extends the lifespan of your equipment. Built to withstand rigorous mining and construction environments, this adapter provides a secure, reliable connection for consistent productivity.

Technical Specifications

Compatible Threads	R32, R38, T38, T45, T51
Length Range	300mm - 800mm
Monthly Production Capacity	3000 pcs

Compatibility

Supported Drill Equipment

Equipment Series / Brand Type

COP Series (e.g., COP1238, COP1838, COP1032)

Furukawa Series (e.g., HD715, HD612, HD609, PD200)

Ingersoll-Rand Series (e.g., VL140, VL671, YH80A)

Tamrock Series (e.g., HLX5, HL600, HL500, HL300, HL700, HL850, HL1000, HL1500)

Logistics

Packaging

Wooden Case • Bundles

Minimum Order Quantity	1 piece
