Overview

Comprehensive feature set including real-time GPS tracking, fingerprint identification, and IP67 ruggedized design.

Advanced Real-Time Guard Monitoring

This high-tech guard tour system integrates fingerprint verification and 4G connectivity to provide verifiable security patrol management. Featuring GPS and Beidou dual-mode localization, it allows for precise real-time tracking and data uploading to a central management center. Designed for durability with an IP67 rating, it ensures reliable performance for surveillance and maintenance personnel in demanding environments.

Key Features

Core Functionalities

GPS+Beidou Tracking, 4G Real-time Upload, Live Fingerprint Verification, Impact Detection, Man-down Alarm, SOS Function, Pedometer, Alarm Clock

Technical Performance

Performance Metrics

3400 mAh

Battery Capacity

12000 pcs/min

Data Transfer Speed

Verification & Security

Fingerprint Verification Modes

- Close
- Once Verify
- Multiple Verify

Communication

Voice & Communication

- 4G HD Voice Call
- Custom Voice Task Prompts
- Operating Voice Prompts

Durability

Protection Rating

IP67 Waterproof • Dustproof • Impact Resistant

Maintenance & Connectivity

Remote Management Capabilities

- Remote Setting Download
- Remote Parameter Updates
- Wireless Checkpoint Updates
- Magnetic USB Charging

Package Contents

Standard Package Includes

- Patrol Device
- Magnetic USB Cable
- Charger
- Management Software
- User Manual
- Packaging Box
