Product Overview

Comprehensive Guard Tour Management

This advanced electronic patrol system ensures effective oversight of security personnel, maintenance staff, and facility surveillance. By strictly enforcing established routes and schedules, it facilitates proactive management of guard performance and operational efficiency. The system includes robust hardware and comprehensive software for real-time monitoring and reporting, making it an essential tool for professional security management.

Technical Capabilities

Four kinds of communication modes

More options are available to staff. You can choose the appropriate way according to your needs.

Supports multiple connectivity modes including 3G, GSM, and USB for reliable field communication.

Communication Modes

- 3G
- GPRS (2.5G)
- GSM
- USB

Tag Detection Range

5 cm

125Khz Tag

10 m

Bluetooth Tag

30 m

2.4G Tag

Durability and Safety

IP67:JWM Basic Demand

IP67 rated housing provides protection against water, dust, and vandalism.

Ingress Protection

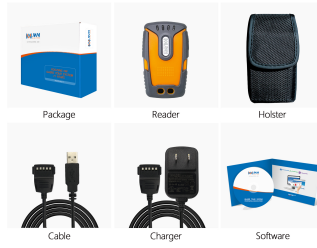

IP67 • Waterproof • Dust-proof • Vandal-resistant

Safety Functionality

Man-Down Detection, Impact Sensing, Slant Detection, SOS Alert

Package Contents

What includes the package ?

Complete set including reader, charger, holster, and software.

Included Components

Item	Quantity
Patrol Reader	1
Holster	1
Data Transfer Cable	1
Power Adapter	1
Management Software	1
