Overview

Advanced Guard Patrol Solution

This guard tour system is designed for professional security monitoring and personnel management. It features an integrated OLED screen for real-time status updates and voice call functionality to facilitate instant communication between guards and management. Built for durability and reliability, it is an essential tool for ensuring comprehensive site security and efficient patrol task completion.

Key Features

Equipped with advanced safety features like panic alarms, man-down detection, and direct calling capabilities.

The system provides voice prompts at checkpoints to ensure specific tasks are completed.

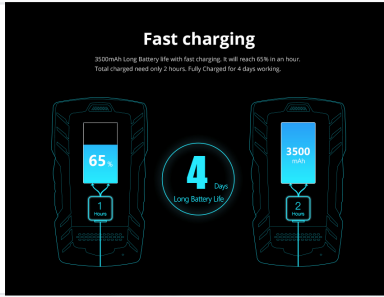

Core Functionalities

Voice Call • Panic Alarm • Impact Detection • Mandown Alarm • Pedometer • Alarm Clock

Task Management

Supports up to 10 tasks per checkpoint with voice-prompted instructions.

Power & Battery

High-capacity battery with fast charging support for extended operational use.

Battery Performance

3500 mAh

Capacity

4 Days

Battery Life

2 Hours

Full Charge Time

Fast Charging Capability

Reaches 65% charge in 1 hour.

Durability

Rugged design with IP67 rating ensures reliability in rainy conditions and harsh environments.

Environmental Rating

IP67, Waterproof, Dustproof, Impact Resistant

Communication

Integrated voice call system allows for rapid communication and emergency coordination.

Voice Call Configuration

5 Groups

Comprehensive cloud platform for real-time monitoring, data analysis, and patrol management.

Cloud Platform Features

- Mobile App Push Notifications
- Patrol Calendar Management
- Comprehensive Data Analysis
- Flexible Operator Permissions
- Real-time Monitoring
