Overview

Professional Guard Tour Solution

This advanced guard tour system provides a robust solution for security monitoring and workforce management. It features integrated voice calling for real-time coordination, task prompting for checkpoints, and a durable design built for harsh field environments. With cloud-based software integration, managers can monitor patrol data, generate reports, and track compliance effectively from any location.

Hardware Performance

Fast charging
3500mAh Long Battery life with fast charging, it will reach 65% in an hour.
Total charging need only 2 hours. Fully charged for 4 days working.

• IP67: Waterproof, dustproof and prevent damage.
• Don't worry to work on rainy day or man-made damage.

Battery Life

3500 mAh
Capacity

4 days
Working Duration

Charging Efficiency

- 65% charge in 1 hour
- Total charging time: 2 hours

Ingress Protection

IP67 • Waterproof • Dustproof

Operational Features

Security Alerts

Panic Alarm, Impact Detection, Man-down Alarm, Pedometer, Alarm Clock

Voice Communication

Supports real-time voice calls with up to 5 preset groups for emergency coordination.

Checkpoint Task Capacity

10 tasks/point

Software Integration

Platform Capabilities

- Real-time data tracking
- Mobile app push notifications
- Sequence patrol management
- Early/late patrol alerts
- Cloud-based triple data protection

Operating Systems

Compatible with all Windows operating systems
