

GX53 Compact Fluorescent Lamp

This compact fluorescent lamp is equipped with a GX53 base. It features a circular shape with multiple fluorescent tubes to maximize light output.

Product Overview

GX53 Compact Fluorescent Lamp

The GX53 Compact Fluorescent Lamp is a specialized lighting solution designed for general illumination applications. Featuring a distinct circular shape, this lamp utilizes multiple integrated fluorescent tubes to maximize light output efficiency within a compact form factor. The design incorporates a standard GX53 base, ensuring seamless compatibility with fixtures specifically engineered for this lamp type.
