

GY6-125 Motorcycle Starter Relay

This is a GY6-125 motorcycle relay designed for starting and controlling electrical circuits in motorcycles. It has robust construction with standard mounting points and electrical connections.

Product Overview

Reliable Starting Performance

The GY6-125 starter relay is engineered to provide dependable electrical control for motorcycles equipped with the GY6-125 engine platform. Featuring robust construction and standard mounting dimensions, it facilitates seamless integration into existing electrical systems. This component is essential for ensuring consistent starter engagement and reliable power distribution during engine ignition.

Electrical Specifications

Contact Current Rating

100 A
Current Capacity

Rated Voltage	12 V
Voltage Absorption Threshold	8 V

Compatibility

Engine Compatibility	GY6-125
