

GY6 50cc 80cc Scooter Variator Set

This variator set is designed for GY6 50cc and 80cc engines found in Chinese scooters and 139QMB motorcycles. It includes the drive pulley, variator face, and weights for optimal performance.

Product Overview

High-Performance Variator Set

This TZ-16 variator set is precision-engineered for 50cc and 80cc GY6 engine platforms. It is designed to optimize transmission performance, enhancing acceleration and overall engine efficiency. The kit serves as a direct replacement for standard components, ensuring a reliable fit and long-lasting durability for various scooter applications.
