

GY6 80cc Air-Cooled Scooter Engine Cylinder Kit

This air-cooled cylinder kit increases the engine capacity to 80cc with a 47mm bore. It is designed as a direct replacement for GY6 50cc engines, enhancing scooter power and performance.

Product Overview

Performance Upgrade Kit

The GY6 80cc Air-Cooled Scooter Engine Cylinder Kit is designed as a performance upgrade for standard 50cc GY6 engines. This comprehensive kit includes the cylinder, piston, piston rings, wrist pin, and circlips, ensuring a complete and reliable installation. Engineered for durability and improved heat dissipation, it provides a noticeable boost in power for your scooter.
