

H-Block Radiator Valve

This H-block valve is designed for connecting radiators to heating systems. Its durable brass construction includes adjustable settings for flow control and compatibility with standard radiator fittings.

Product Overview

Professional H-Block Radiator Valve

This brass H-block valve is engineered for seamless integration of radiators into central heating systems. It features a robust design that supports both domestic and commercial installations. With built-in flow control capabilities, it ensures efficient operation and reliable performance for various heating configurations.

Technical Details

Material	Brass
Flow Control	Yes
Suitable Applications	Domestic, Commercial

Compatibility

Fitting Compatibility	Standard radiator fittings
