Product Overview

H Frame Modular Scaffolding System

The H Frame Modular Scaffolding System is a robust and versatile solution designed for construction, maintenance, and repair projects requiring safe elevated work platforms. Featuring a durable galvanized steel construction, this system offers high strength and stability for both indoor and outdoor applications. Its modular design ensures easy assembly and disassembly, while stackable components allow for efficient storage and transport on job sites.

Technical Specifications

Compliance

Safety Standard Compliant

Material

Galvanized Steel

Key Features

Modular Design, Stackable, Adjustable Height, Corrosion Resistant
