

H-Type Electrical Terminal Block

H-type terminal blocks provide secure connection points for multiple wires. The blocks feature a central channel to separate and insulate the terminals.

Overview

Professional H-Type Terminal Blocks

The H-series 12-pole terminal blocks provide a reliable and organized solution for continuity or branching connections between electric conductors. Designed for versatility, these blocks feature high-quality brass inserts housed within durable plastic casings. They are engineered to meet stringent electrical standards, ensuring safe and efficient performance in various wiring applications.

Technical Specifications

Construction Materials

- Brass (Insert)
- PE (Plastic)
- PP (Plastic)
- PA (Plastic)

Number of Poles

12

Available Colors

Natural, Black, White

Compliance & Ratings

Operating Temp (PE)

-5 °C

Min Temp

85 °C

Max Temp

Operating Temp (PA)

-30 °C

Min Temp

110 °C

Max Temp

Standards Compliance
