

# H07V-R Single Core PVC Insulated Copper Wire

This H07V-R wire is a single-core, non-sheathed electrical wire with PVC insulation. It features a stranded copper conductor for enhanced flexibility and is designed for internal wiring.

## ADDITIONAL IMAGES

## Product Overview

### H07V-R Single Core Electrical Wire

The H07V-R is a high-quality, single-core electrical wire featuring a stranded copper conductor and durable PVC insulation. Designed for flexibility and ease of installation, this non-sheathed wire is ideal for internal wiring in appliances, lighting fixtures, and control panels. Its robust construction ensures reliable performance in diverse electrical applications, including indoor switch sockets and small power tools.

## Technical Specifications

### Voltage Rating

**450 V**

Lower Limit

**750 V**

Upper Limit

<b>Conductor Material</b>	Plain annealed copper, strand class 2
<b>Insulation Material</b>	Polyvinyl Chloride (PVC)
<b>Working Temperature</b>	-15°C to +70°C (customizable to 90°C or 105°C)
<b>Min. Bending Radius</b>	5 x Outer Diameter

## Product Features

### Available Colors

Red • Yellow • Blue • Green • Brown • Black • White • Grey • Yellow/Green

### Compliance Standards

IEC 60227, BS 6004, GB/T 5023-2008, JB/T 8734-2016, BS EN 50525, VDE 0281, UL 83

## Logistics & Ordering

### Packaging Methods

- 100 meters per roll
- Plastic reel
- Wooden pallet
- Wooden drum

### Delivery Time

3-5 working days after deposit
