

Half Metal Blind Ventilating Fan

This ventilating fan features a half-metal blind design for efficient air extraction. It incorporates a robust motor for reliable performance and easy installation.

Product Overview

Professional Ventilation Solution

This half-metal blind ventilating fan is engineered for efficient air extraction in demanding environments. Featuring a robust motor for reliable, long-term performance, the unit is designed for durability and ease of installation. The integrated blind mechanism effectively minimizes light entry and unwanted drafts when the fan is not in operation, making it an ideal choice for bathrooms, kitchens, and other spaces requiring consistent ventilation.

Design & Construction

Construction Type	Half-metal blind design
Recommended Applications	Bathroom, Kitchen, Residential Ventilation

Performance Features

Key Benefits

- Robust motor for reliable performance
- Durable, long-lasting construction
- Integrated blind to reduce drafts and light entry
- Designed for easy installation
