

Halogen Convection Oven 11.5 Liter Capacity

This electric halogen convection oven is designed for efficient and even cooking. Its 11.5 liter capacity, halogen heating, and convection ensure rapid and uniform heat distribution.

Product Overview

Efficient Halogen Convection Cooking

The Electric Halogen Convection Oven is a versatile kitchen appliance designed for efficient and even cooking. Utilizing a 1300W heating element, it combines halogen heat with convection technology to ensure rapid, uniform heat distribution and significant energy savings. Its transparent glass bowl allows for easy monitoring, making it an ideal solution for baking, roasting, and grilling in any modern kitchen.

Technical Specifications

Model Number	HC-921
Capacity	11.5 Liters
Power Rating	1300 W
Voltage	110V/240V
Frequency	50/60Hz

Performance

Temperature Range

65 °C

Min Temp

250 °C

Max Temp

Features

Safety & Control

- Automatic shut-off
- User-friendly temperature controls
- User-friendly timer controls
- Transparent glass bowl for monitoring

Cooking Applications

Baking, Roasting, Grilling
