Product Overview

Versatile Halogen Convection Cooking

This multifunction halogen convection oven offers a healthy, efficient alternative to traditional cooking methods. By circulating hot air around food, it ensures even cooking while searing the outside to seal in natural juices. The transparent, heat-resistant glass bowl allows for clear monitoring of your meal throughout the entire cooking process.

Cooking Capabilities

Cooking Functions

Broil, Roast, Bake, Grill, BBQ, Fry (Oil-free), Steam, Defrost

Technical Specifications

Health Features

- Oil and fat-free cooking
- No soot generation
- Non-radiative heating technology

Maximum Temperature

250 °C

Design & Usability

Design Highlights

Transparent Glass Bowl • Heat Resistant • Easy to Clean • Simple Controls

Operational Indicators

- Adjustable Temperature Control
- Adjustable Timer
- Power Indicator Light
- Operational Indicator Light
