Product Overview

High-Performance Halogen Lighting

These halogen headlight lamps are engineered for reliable, consistent illumination in automotive headlight systems. Designed to support both upper and lower beam applications, they provide essential visibility for safe driving conditions. Built with precision, these lamps ensure a standard fit and performance profile suitable for automotive lighting requirements.

Technical Specifications

Bulb Type	H1
Application	Upper Beam, Lower Beam

Dimensions

Filament Height

Overall Height (Max)	44 mm
Bulb Diameter (Max)	8.5 mm
