Product Overview

Professional Cable Tensioning Tool

This high-capacity hand power puller is engineered for demanding applications in power transmission construction and telecommunications engineering. Designed to provide reliable conductor and cable tensioning, it features robust construction for heavy-duty use. The tool is built to ensure precision and safety during wire tightening operations in industrial environments.

Technical Specifications

Rated Capacity

3 T

Pulling Capacity

Primary Applications

Power Transmission, Telecommunications Engineering, Wire Tensioning, Conductor Installation

Service & Logistics

Customization

- Custom Logo Printing
- Customized Product Details
- Customized Packaging

Service Standards

24/7 Support • Strict Quality Control • Warranty Included

Lead Time

3-7 days for mass production
