

Hand Notcher Tool for Sheet Metal

This hand notcher creates precise notches in sheet metal and similar materials. The tool features a spring-loaded handle for ease of use and hardened jaws for durability.

Overview

Precision Sheet Metal Notching

This hand notcher is a specialized tool engineered for creating precise, clean notches in sheet metal. Featuring a spring-loaded handle for consistent operation and hardened jaws for long-lasting durability, it is designed for demanding environments. It is an essential tool for HVAC professionals and metal fabricators who require accurate 90-degree V-shaped notches for efficient material bending and joining.

Technical Specifications

Notch Angle	90 degrees
Notch Shape	V-shaped

Features

Key Features

- Spring-loaded handle for easy operation
- Hardened jaws for durability
- Compact design for portability
- Consistent notching performance

Applications

Usage Environment

On-site • Workshop

Common Industries	HVAC, Sheet Metal Fabrication, Metalworking
