

Hand Operated Hydraulic Workshop Press

This hand operated hydraulic workshop press is designed for various pressing applications. It features adjustable work table height and a pressure gauge for precise control.

Overview

Heavy-Duty Workshop Press

This hand-operated hydraulic workshop press is engineered for demanding pressing applications in professional environments. Featuring a robust frame construction, it provides the stability and durability required for metal forming, straightening, bending, and assembly tasks. With an adjustable work table and an integrated pressure gauge, this unit offers the precision and control necessary for high-quality workshop operations.

Technical Specifications

Operation

Hand Operated • Hydraulic

Model Identifier

MSY20/15

Primary Applications

Metal Forming, Straightening, Bending, Assembly

Features

Key Features

- Robust frame construction
- Adjustable work table height
- Integrated pressure gauge
- High-force hydraulic cylinder
