Overview

Professional Hand Operated Test Pump

The PumpSB-25 is a robust and reliable hand-operated test pump engineered for precise pressure testing of pipelines, containers, and various pressure-bearing systems. It features a durable construction with an integrated reservoir, allowing for portable and efficient operation in diverse professional environments. Equipped with a clear pressure gauge, lever handle, and a controlled pressure release valve, this tool ensures accurate readings and safe pressure management for critical testing tasks.

Technical Specifications

Maximum Test Pressure

50 bar

Max Pressure

725 psi

Max Pressure

Certifications

GS, CE

Key Features

Core Functionalities

- Integrated precision pressure gauge
- Manual lever handle operation
- Controlled pressure release valve
- High-capacity storage reservoir
- Compact and portable design
