

Hand Pallet Truck

This hand pallet truck facilitates the efficient horizontal movement of palletized goods. The integral pump body and oil-free bearings ensure a sealed hydraulic system, reduced operating power, and extended service life.

Overview

Robust Material Handling Solution

This hand pallet truck is a reliable piece of equipment designed for the efficient horizontal movement of palletized goods. Constructed with heavy-duty steel, it is built to ensure longevity and durability in demanding industrial environments. The hydraulic lifting mechanism allows for smooth, effortless operation, making it an essential tool for warehouses, factories, and distribution centers.

Key Features

Design Focus

- Ergonomic handle for comfortable operation
- Sturdy wheels for easy maneuverability
- Smooth hydraulic lifting mechanism

Certifications	CE
Material	Heavy-duty steel

Application

Suitable Environments

Warehouses • Factories • Distribution Centers
