

Hand-Push Road Line Marking Machine

This machine is mainly used for small-scale road line marking work such as pedestrian lines, parking lots and athletic fields. It has a lockable wheel steering device to ensure the marking machine works in a straight line or changes direction on curving roads freely.

ADDITIONAL IMAGES

Product Overview

Robust design for asphalt and concrete surfaces.

Professional Hand-Push Line Marking Machine

This high-efficiency hand-push road line marking machine is designed for small-scale projects including pedestrian crossings, parking lots, and athletic fields. Featuring a durable alloy chassis and a high-pressure airless pump, it ensures consistent, high-quality application with stable pressure. The unit offers flexible operation with lockable wheel steering for straight lines or curved paths, and supports optional upgrades like self-propulsion and waterborne paint systems.

Technical Specifications

Powerful engine and precision marking system.

Maximum Flow

2.8 L/min

Maximum Flow

Model	HQ55
Overall Dimensions	1000 x 800 x 900 mm
Line Width Range	50-250mm

Features & Options

Sturdy frame and dispensing mechanism.

Optional Equipment

- Roll booster (Self-propulsion kit)
- Stainless steel spray system (for waterborne paint)
- Microelectronics control system
- Warning light

Key Features	Alloy Chassis, High-Speed Bearings, Inflatable Tyres, Airless Pump, Lockable Steering
