

Handheld Blower Vacuum 25.4cm³ 0.75kW

This handheld blower vacuum features a spring connecting structure for shock absorption. Its double-faced impeller enhances wind power for efficient cleaning.

Product Overview

High-Efficiency Handheld Blower Vacuum

This handheld blower and vacuum unit is engineered to make garden and yard cleanup significantly faster and easier. It is powered by an easy-starting engine that balances high power and air volume with reduced noise, weight, and emissions. Designed for operator comfort, the unit also features lower fuel consumption and minimized vibration, making it an ideal tool for efficient debris management.

Technical Specifications

Power Output

0.75 kW
Power Output

1.02 hp
Horsepower

Engine Displacement	25.4 cm ³
Average Air Volume	0.13 m ³ /s

Compliance & Features

Included Accessories

- Collection bag
