

Handheld Cable Cutter

This handheld cable cutter is designed for efficiently cutting cables. It features a robust construction and ergonomic handles for comfortable use.

Product Overview

Professional Grade Cable Cutting

The CC-325 is a professional-grade handheld cable cutter designed for efficiency and ease of use. Featuring a robust forging blade and a specialized ratcheting unit, it allows for significant energy savings during operation. Its compact design and safety lock mechanism make it a reliable, portable tool for electricians and technicians working with standard copper and aluminum cables.
