

Handheld Concrete Vibrator

This handheld concrete vibrator is designed for consolidating concrete during construction. It operates at ~220V with power options of 580W or 800W and frequencies of 210Hz or 260Hz.

Product Overview

High-Efficiency ZN Series Handheld Concrete Vibrator

The ZN Series handheld concrete vibrator is a professional-grade tool designed for efficient concrete consolidation in various construction projects. Available in two power configurations, this unit delivers consistent performance to ensure structural integrity and reduce air pockets in poured concrete. Its ergonomic design and reliable motor make it an essential piece of equipment for contractors seeking durability and ease of use on the job site.
