

Handheld Drywall Sander

This hand-held drywall sander is designed for efficient and precise sanding of drywall surfaces. It operates on a voltage of 110-120V at 60Hz or 220-240V at 50Hz, with an input power of 710W.

Product Overview

Professional Surface Preparation

This professional-grade handheld sander is engineered for the efficient renovation and polishing of diverse surfaces, including wood, plastic, metal, stone, and composite materials. Designed for versatility, it excels in tasks ranging from rough sanding to fine finishing before puttying. With features like soft-start technology and an adjustable vacuum adapter, it ensures a cleaner, more controlled working environment for professional contractors.
