Product Overview

High-Performance Mixing Solution

This handheld electric mixer is engineered for professional-grade mixing of high-viscosity materials, including putty, mortar, resins, and emulsion paints. It features a robust design with triple gear reduction to maximize torque, ensuring efficient and consistent results. The ergonomic handle design minimizes operator fatigue during extended use, while the variable speed control allows for smooth, splash-free power transmission.

Technical Specifications

Input Power

1600 W
Input Power

Voltage/Frequency	230V/50Hz
No-load Speed	0-560 (0-850) r/min
Connection	M12, 14
Max Mixing Paddle Diameter	120 mm
Drill Capacity	13 mm

Safety & Design

Safety Features	Double Insulation, Protective Class II, Variable Speed Control

Logistics

Packing Details

Specification	Value
Units per Carton	2 pcs
Carton Dimensions	61 x 34 x 52 cm

Applications

Suitable Materials

- Putty
- Mortar
- Resins
- Emulsion paints
