

# Handheld Garment Steamer with Brush Attachment

This handheld steamer is designed for garment care, offering a convenient way to remove wrinkles. It features a water reservoir for steam generation and includes a brush attachment for fabric smoothing.

## Product Overview

### Professional Garment Care

The SBY-D007 handheld garment steamer offers a versatile solution for fabric maintenance, combining deep-penetrating steam with an integrated brush attachment. Its internal pump system ensures reliable operation while preventing water leakage for a seamless user experience. Compact and portable, this device is designed to soften garments and remove dust, making it an essential tool for maintaining professional attire.
