

Handheld Gas Powered Leaf Blower

This handheld blower features a spring connecting structure for effective shock absorption. Its double-faced impeller enhances wind strength for efficient cleaning.

Overview

Professional Garden Maintenance

This handheld gas-powered blower and vacuum unit is engineered to make garden and yard cleanup tasks faster and more efficient. Designed with user comfort in mind, it features reduced noise, weight, and vibration levels, while simultaneously improving power output and air volume. It is an optimized solution for professional landscaping needs, combining reliable performance with lower fuel consumption and emissions.

Technical Specifications

Power Output

0.7 kW

Power Output

0.95 hp

Horsepower

Engine Displacement	25.4 cm ³
Average Air Volume	0.13 m ³ /s

Compliance & Standards

Certifications	CE, GS, EURO II, EMC
----------------	----------------------

Key Features

Performance Benefits

- Easy starting mechanism
- Reduced noise and vibration
- Lightweight design for improved handling
- Lower fuel consumption
- Lower emissions
