

Handheld GPS Receiver with Monochrome Display

This rugged handheld GPS receiver is designed for outdoor use. It features a monochrome display, keypad interface, and lanyard for secure carrying.

Product Overview

Rugged Navigation Solution

This handheld GPS receiver is engineered for reliability in demanding outdoor environments. Featuring a high-contrast monochrome display and a tactile keypad interface, it ensures ease of use for navigation, surveying, and data collection tasks. The device is protected by a durable, ruggedized housing, making it an ideal tool for field professionals requiring consistent performance.

Physical Characteristics
