Product Overview

Professional Grass Maintenance

This handheld grass shear is engineered for precise trimming and edging in hard-to-reach areas. Featuring a rotating head for versatile cutting angles, it ensures clean, efficient cuts for lawn maintenance. The durable construction and ergonomic design provide both comfort and long-lasting performance for professional landscaping tasks.

Key Features

Core Features

- Rotating head for precise trimming
- Hardened steel blades
- Ergonomic handle design
- Safety locking mechanism

Primary Application

Lawn Edging • Grass Trimming • Precision Pruning
