

Handheld Grout Removal Tool

This hand tool is designed for removing grout from between tiles. It features a toothed blade secured with a screw and a contoured handle for a comfortable grip.

Product Overview

Professional Grout Removal

This handheld grout removal tool is designed for efficient and precise extraction of old or damaged grout from between tiles. Featuring a durable, serrated stainless steel blade, it offers five distinct cutting edges to ensure consistent performance during renovation tasks. The tool is equipped with a comfortable, moulded soft-grip handle, providing the control necessary for detailed work.
