

Handheld Inspection Camera with Probe

This is a handheld inspection camera with a display screen, keypad, and integrated probe. It is designed for remote visual inspection in confined spaces.

Product Overview

Professional Inspection Capability

This handheld inspection camera is designed for efficient remote visual inspection in confined or hard-to-reach spaces. Featuring an integrated probe and a dedicated display screen with a keypad interface, it allows users to navigate and view internal environments clearly. It is an essential tool for maintenance, diagnostics, and quality control tasks.
